RFE: cosa significa?

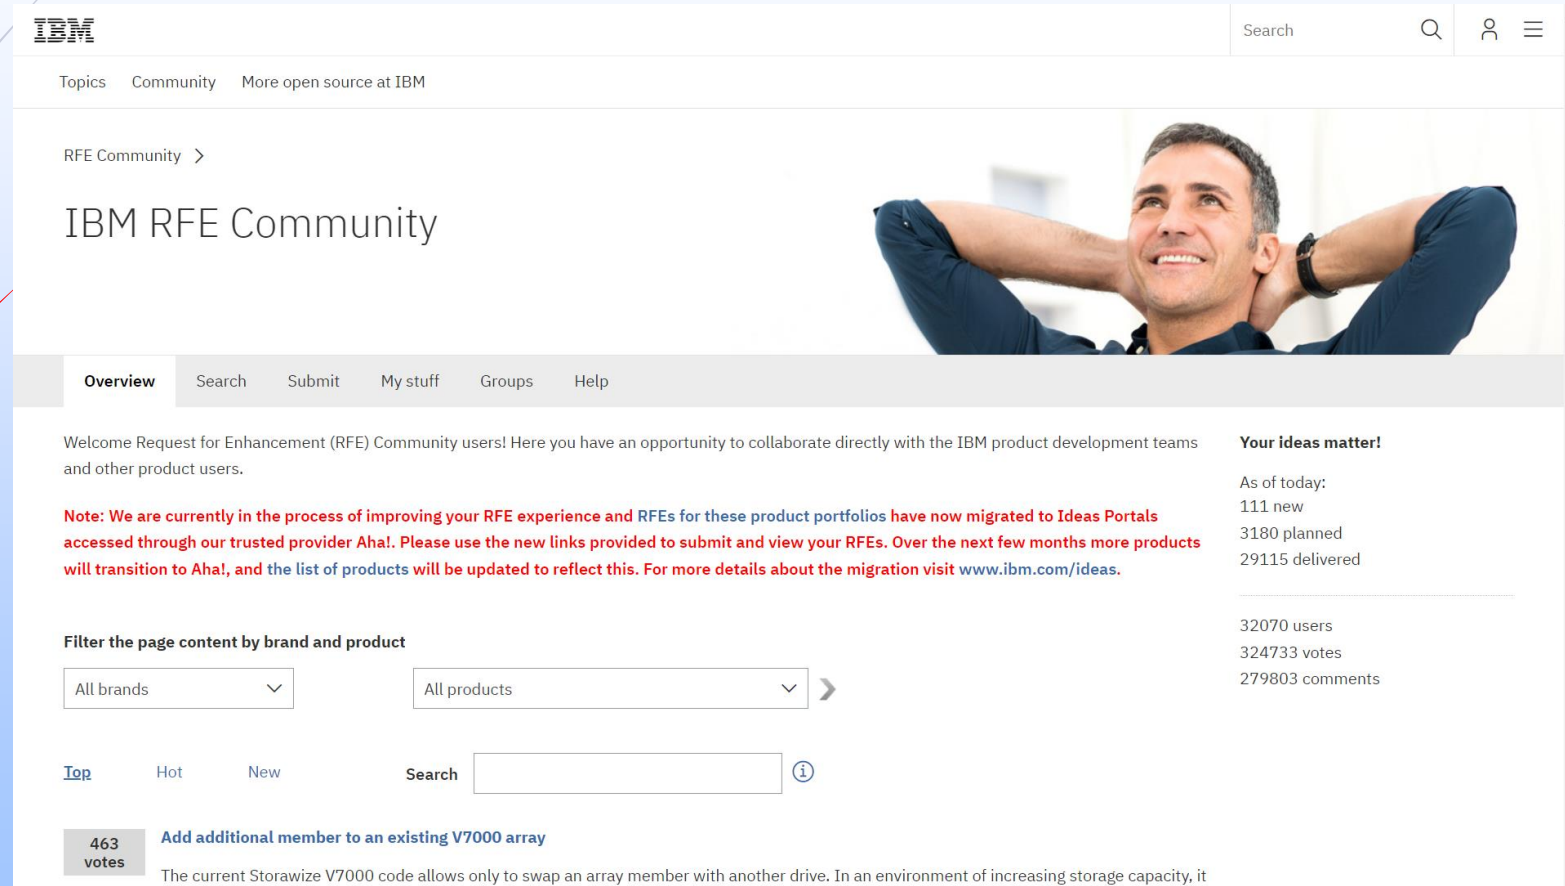

- ▶ **R**equest **F**or **E**nhancement
- ▶ Vorresti proporre a IBM di introdurre una nuova funzionalità nel sistema operativo IBM i o in uno dei prodotti programma?
- ▶ Vorresti proporre una modifica a una funzionalità già esistente?
- ▶ Queste sono le RFE che i clienti, business partners, IBMers possono suggerire ai laboratori IBM

Welcome Request for Enhancement (RFE) Community users! Here you have an opportunity to collaborate directly with the IBM product development teams and other product users.

Note: We are currently in the process of improving your RFE experience and RFEs for these product portfolios have now migrated to Ideas Portals accessed through our trusted provider Aha!. Please use the new links provided to submit and view your RFEs. Over the next few months more products will transition to Aha!, and the list of products will be updated to reflect this. For more details about the migration visit www.ibm.com/ideas.

IBM Ideas

➔ Dal 2022 il portale RFE è migrato nel nuovo portale **IBM Ideas**

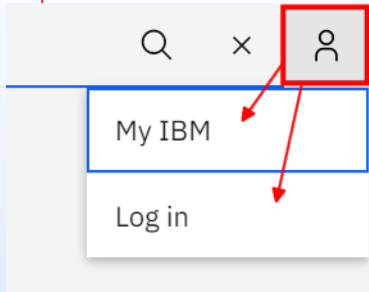

<https://ideas.ibm.com/>

The screenshot shows the IBM Ideas portal interface. At the top left is the IBM logo and the text "IBM Ideas". On the right side of the header are search and user profile icons. Below the header is a section titled "My Ideas" with a descriptive paragraph and links for "FAQs" and "Need help? Email us at ideasibm@us.ibm.com". A blue button labeled "Add a new idea" with a plus sign is on the left. On the right, there is a "Sort By" dropdown menu set to "Recently Created". A left sidebar contains navigation links: "My Ideas", "My Votes", "My Comments", "My Subscriptions", and "Search". Below the sidebar is a "Filter by product" section with a button for "All Products" and a count of "3". The main content area displays three idea cards. Each card has a title, a description, and a status tag. The first card is titled "RD i 9.6: RSE filter/show in table - select member by modified date like F17 in PDM" with a "Future consideration" tag. The second card is titled "ARE Administration runtime expert: improve scheduling" with a "Future consideration" tag. The third card is titled "RDPower 8.0.3: RSE filter/show in table - select member by modified date like F17 in PDM" with a "Not under consideration" tag. Each card also shows engagement metrics like thumbs up/down and comment counts, and creation/last updated dates.

My IBMid

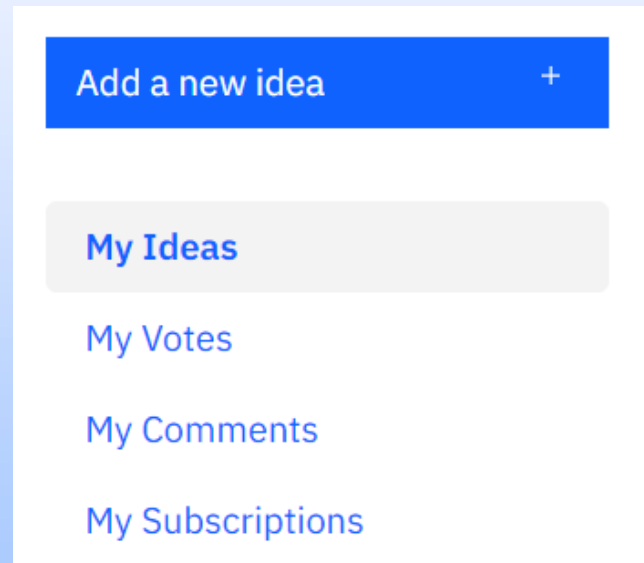

- E' consigliabile creare un proprio profilo **IBMid** per una migliore esperienza di utilizzo di IBM Ideas e di tutti i portali IBM
- La registrazione è gratuita

A screenshot of the IBM account creation page. The page features the IBM logo at the top left. The main heading is 'Create your IBM account' with the subtext 'Access to trials, demos, starter kits, services and APIs'. On the right side, there is a form titled 'Sign up for an IBMid'. The form includes a link for existing users: 'Already have an IBM account? [Log in](#)'. Below this, the form is divided into sections, with the first section being '1. Account information'. It contains an 'E-mail' field with an information icon (i) and a text input box. Below the input box, there is a note: 'Your email address will become your IBMid, which you'll use to log into IBM.com.' At the bottom of the page, there is a URL: <https://www.ibm.com/account/reg/us-en/signup?formid=urx-19776>

IBM i ACS - Run SQL scripts adding Display as Hotspots, like in 5250 Emulation

When developing SQL scripts IBM allows you to add comments. In many cases I add HTTP links as comment. Currently RSS does not recognize them as URL Hotspots. Would it not be great when adding URLs as comments that you could use them without having to use cut & paste?

<https://ibm-power-systems.ideas.ibm.com/ideas/IBMI-I-3204>

New IBM i Service for SMTP

I would like an IBM i Service to view and manage the Simple Mail Transfer Protocol (SMTP) on IBM i.

Ideally this service would not only allow a user to view and or modify the configuration of SMTP but also to view the Email History stored within that system in the manor made available by the Work with SMTP Emails command WRKSMTPEMM

Support USER as Default for VARCHAR(10) Columns in Db2 SQL Tables

Currently if I have a table with a varchar(10) field in it, I cannot specify DEFAULT USER or any of the other user registers because they are 18 bytes or longer.

However on IBM i, user Profiles are 10.

It would save me having to write a Trigger for every file I create to do the assignment anyway and have the CREATE TABLE statement support DEFAULT USER for VARCHAR(10) column definitions.

Stato delle "idee"/1

- ▶ **Submitted**: stato iniziale per un'idea appena creata
- ▶ **Under review**: il team IBM sta analizzando l'idea per prenderla o meno in considerazione
- ▶ **Needs more information**: il team IBM ha bisogno ulteriori informazioni per analizzare l'idea
- ▶ **Future consideration**: questo potrebbe essere lo stato più lungo. Il team IBM ritiene l'idea interessante e potrebbe (ma non è garantito) prenderla in considerazione per futuri sviluppi
- ▶ **Planned for future release**: il team IBM ritiene l'idea molto interessante e ci sono buone probabilità che venga implementata

Stato delle "idee"/2

➤ **Delivered**: la soluzione è pronta

➤ **Functionality already exists**: la richiesta è una funzione già esistente

➤ **Not under consideration**: il team IBM non ha preso in considerazione di implementare la richiesta
